

Winter Sewer Average

Winter Sewer Averaging

Residential

Sewer charges for residential customers are based on a winter sewer average. The average water consumption used during the winter months of January, February, and March each year determines your monthly sewer charge for the next twelve months. The new winter average goes into effect on the April billing each year.

Should you have a water leak during this period, you may request a *Sewer Adjustment* from the Customer Service Department.

Commercial

Sewer charges for commercial customers are based on the monthly water consumption.
